

1.7 SUMMARY In a nutshell, this project has a good potential benefits for IIUM community and also to the public. So far, there is no proper platform for people to rent and lend their items online in Malaysia. So, this is a good opportunity for us to test and implement the sharing economy in the country, specifically IUM campus. The main idea of this project is to provide a solution for the users to perform their tasks efficiently without spending their money on liabilities. We hope that this project will see the light of success and give us a good experience and bring benefits to all IIUM community.
